ACKNOWLEDGMENTS

In an organization such as the Arkansas Department of Health, it is, of course, impossible to acknowledge everyone who plays a role in the development of a report of this nature. There are, however, several people and organizations who deserve special mention.

The Center for Health Statistics has primary responsibility for the analysis of vital statistics data and for the preparation of Arkansas Vital Statistics: 1990. This report was prepared under the general supervision of Douglas R. Murray, Director. Werner Haney, Director of Vital Statistics Section, and Dorene Harris, Statistician, designed most of the tables in this report. Carol Nilles, Management Project Analyst, analyzed the data and generated the tables for the report, with special thanks to Joyce Eatmon, Health Program Analyst, for producing the marriage and divorce tables, John Senner, Sr. Research Analyst, for his work on fetal deaths, and Paul Johnson, Sr. Research Analyst, for his technical expertise.

Special recognition must also be given to other staff in the Center for Health Statistics for their contributions to the production of this report. Debbie Campbell (Nosologist) codes and keys cause of death from the death certificates. Bettye Belleton, Ida King, Mary Richardson, Ann Thompson, Zettie Todd, and Judy Tuberville (Documents Examiners) have many duties. These include coding and keying occupation and industry data, data entry of induced abortion and fetal death data, keying all out-of-state birth and death certificates, and many other activities that are essential to the smooth functioning of the Center for Health Statistics. Charlotte Caldwell (Secretary) is responsible for the distribution of the report.

The Division of Vital Records (Henry Robinson, Jr., Director and State Registrar) is responsible for the collection and registration of all vital events. It is the data from these records which are the source of the information presented in this report.

The Division of Data Processing (Gerald Perkins, Director) provided the computer facilities for data entry, management, and analysis.

The Demographic Research Division, Center for Research and Public Policy, University of Arkansas at Little Rock (Mary A. McGehee, Research Technician and Programmer) provided the population data which enabled the calculation of many of the rates. The Center for Health Statistics has modified these data to reflect the current statistics, using the 1980 and 1990 census data.

Most out-of-state occurrences of vital events to Arkansas residents are incorporated into this report through inter-state exchange agreements. However, marriage, divorce, spontaneous abortion, and some induced abortion data are not received from other states.

DEFINITIONS

AGE - Age in years as of last birthday. For infants, age may be stated in days, weeks or months.

ANNULMENT - Legal invalidation or voiding of a marriage, which confers on the parties the status of never having been married to each other.

DEATH - Permanent disappearance of any evidence of life at any time after live birth.

DIVORCE - Final legal dissolution of a marriage.

FETAL DEATHS (STILLBIRTHS) - Death prior to the complete expulsion or extraction from its mother of a product of human conception, with 20 weeks or more gestation and/or weighing 500 grams or more; the death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles. (This definition was effective with the 1983 events.)

INDUCED ABORTION (Induced termination of pregnancy) - Intentional termination of pregnancy with the intention other than to produce a liveborn infant or to remove a dead fetus.

INFANT DEATH - Death of an individual under one year of age.

LIVE BIRTH - Complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

LOW BIRTH WEIGHT BIRTH - Any liveborn infant whose birth weight is under 2500 grams (5 1/2 pounds).

MARRIAGE - Legal union of persons of opposite sex.

MATERNAL DEATH - Death attributable to delivery or the complications of pregnancy, childbirth or the puerperium.

NEONATAL DEATH - Death occurring to an individual less than 28 days of age.

OCCURRENCE, PLACE OF - County and state where the event occurred.

POSTNEONATAL DEATH - Death occurring to an individual 28 days of age or more, and less than one year.

RACE - Recorded as the individual states on certificate for mother, father or decedent.

RESIDENCE, PLACE OF - County and state of usual place of residence. For births and fetal deaths, usual place of residence of mother is used. Residence may be different than mailing address.

SPONTANEOUS ABORTIONS (MISCARRIAGES) - Termination of pregnancy through natural causes and without the aid of mechanical or medicinal agents, with the duration of pregnancy being less than 20 weeks gestation and weighing less than 500 grams. (This definition was effective with the 1983 events.)

UNDERLYING CAUSE OF DEATH - Disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of the accident or violence which produced the fatal injury. The cause of death codes used in this report are from the International Classification of Diseases, 9th Edition (ICD-9).

WEEKS GESTATION - The period of gestation (length of pregnancy) is the number of completed weeks elapsed between the first day of the last menstrual period and the date of delivery or termination.
